Risk Assessment Summary					
<p><b>Have you identified any risks arising from the implementation of this policy / procedure / written control document?</b></p> <p>No risks identified</p>					
<p><b>Have you identified any Information Governance issues arising from the implementation of this policy / procedure / written control document?</b></p> <p>No risks identified</p>					
<p><b>Have you identified any training and / or resource implications as a result of implementing this?</b></p> <p>None identified</p>					

## 1 Introduction

The Controlled Drugs Accountable Officer is appointed to ensure that systems for the safe management and use of controlled drugs are secure within Powys Teaching Health Board. The appointment and responsibilities of the CDAO are set out in the Controlled Drugs (Supervision of Management and Use) (Wales) Regulations 2008.

The above regulations contain a requirement for the CDAO to establish and operate systems for recording, assessing and investigating concerns and untoward incidents relating to the safer management of controlled drugs.

Reports relating to the safer management of controlled drugs are routinely received by the health board's Medicines Management dept.

## 2 Objective

This document sets out how the Medicines Management dept. will manage reports of concerns or incidents relating to the prescribing or management of controlled drugs. It is designed to ensure that such reports are managed efficiently and in accordance with current legislation and guidance.

## 3 Definitions (Mandatory Heading)

- **CD** – Controlled Drug
- **CDAO** – Controlled Drugs Accountable Officer
- **MM** – Medicines Management dept.
- **NWSSP** – NHS Wales Shared Services Partnership
- **PTHB** – Powys Teaching Health Board
- **SOP** – Standard Operating Procedure

## 4 Responsibilities

### 4.1 Chief Pharmacist

The Chief Pharmacist must:

- Ensure all staff read and understand this procedure
- Arrange regular review to monitor compliance with this procedure

### 4.2 Controlled Drugs Accountable Officer

The CDAO must:

- Ensure all concerns and incidents are recorded appropriately.

	<ul style="list-style-type: none"> <li>• Assess all concerns and incidents and, where required, initiate an investigation.</li> <li>• Where considered necessary, establish an incident panel to investigate a concern.</li> <li>• Ensure that appropriate action is taken to protect patients and members of the public, in relation to concerns about the management of controlled drugs.</li> <li>• Share relevant information with the controlled drugs local intelligence network.</li> </ul>
	<p><b>4.3 Senior Pharmacists</b></p> <p>The Senior Pharmacists must:</p> <ul style="list-style-type: none"> <li>• Ensure staff are trained in using this procedure</li> <li>• Ensure dissemination of this document</li> <li>• Support MM staff with implementing this procedure</li> <li>• Manage investigations in support of / as delegated by the CDAO</li> <li>• Monitor incidents for themes or trends which may indicate wider issues</li> <li>• Escalate concerns to the CDAO</li> </ul>
	<p><b>4.4 All MM Staff</b></p> <p>All MM staff must:</p> <ul style="list-style-type: none"> <li>• Be aware and familiar with this standard operating procedure</li> <li>• Manage CD incidents/concerns in line with this procedure</li> <li>• Seek support from senior colleagues where required</li> </ul>
<p><b>5 Process</b></p>	
	<p><b>5.1 Receiving a Concern</b></p> <p>All concerns or incidents relating to the management of controlled drugs should be reported via email to <a href="mailto:Powys.CDAO@wales.nhs.uk">Powys.CDAO@wales.nhs.uk</a> within 48 hours of the concern arising.</p> <p>Information about concerns or incidents received via an alternative route should be forwarded to the above email address in the first instance.</p> <p>All concerns should be brought to the attention of the CDAO without delay. Where the CDAO is not available, the concern should be brought to the attention of the most appropriate senior pharmacist or senior pharmacy technician, depending upon availability and which setting the concern relates to.</p>
<p><b>5.2 Allocating a Concern for Assessment or Investigation</b></p>	

The CDAO, or the pharmacist or pharmacy technician notified of the concern in the CDAO's absence, will risk assess the concern in line with the Controlled Drug Risk Assessment Tool (Appendix One).

Considering the nature of the concern and risk assessment, the concern should be delegated in writing (e.g. by email) to an appropriate member of the Medicines Management dept. (*the delegated person*) for further investigation.

The CDAO, or deputizing member of the MM team will indicate if immediate contact with one or more external authorities is required, including but not limited to:

- Police
- Counter Fraud Services
- NWSSP
- Health Inspectorate Wales
- The appropriate professional regulator (e.g. NMC, GPhC, GMC)

Any request to an external authority to undertake or support an investigation should be recorded.

### **5.3 Recording a Concern**

The delegated person should record the concern using the *Controlled Drug Concern Incident Record* at J:\Medical\MM\Controlled Drugs\CD Incidents\CD Concern Incident Record.

In all cases where they have not already done so, the original reporter of the concern should be requested to complete and return a *CD Incident Report Form*, available at J:\Medical\MM\Controlled Drugs\CD Incidents\Powys THB\_CD\_incident\_report\_form.docx

Where indicated by the risk assessment, the concern should also be recorded on Datix at <http://nww.powysthb.wales.nhs.uk/incident-reporting-datix>. The initial Datix should be recorded by the original reporter where possible, but may be recorded by a member of the MM dept. where necessary (e.g. the original reporter does not have access to DATIX).

### **5.4 Investigating a Concern**

The delegated person should take all reasonable steps to support the investigation of a concern, fully and within an appropriate timescale considering the nature of the concern and the risk assessment.

In the majority of low risk cases, the investigation should be undertaken by the contractor/professional about whom the concern has been raised (e.g. a dispensing "near miss" should be investigated by the dispensing contractor). The delegated person should offer advice and support as appropriate.

The investigation should produce, or support the production of a significant event analysis which indicates that:

- The concern has been fully investigated; and
- The concern has been reflected upon; and
- Relevant learning has been considered and shared; and
- Action has been taken to reduce the risk of recurrence; and
- The concern is not reflective of a theme or trend which may indicate wider issues

For concerns of moderate risk or higher, the delegated person should lead the investigation, with support from the relevant contractor/professional about whom the concern has been raised where considered appropriate. The delegated person may engage one or more external authorities in the investigation where necessary. These may include, but are not limited to:

- NHS contractors (e.g. GP practices, community pharmacies, dentists, optometrists)
- Professional regulators (e.g. GMC, GPhC, NMC, GDC, GOC)
- Dyfed-Powys Police (link is PC Andrew Smart, [andrew.smart@dyfed-powys.pnn.police.uk](mailto:andrew.smart@dyfed-powys.pnn.police.uk), Tel 01267 226225)
- Counter Fraud (link is Kirsty James, [kirsty.james5@wales.nhs.uk](mailto:kirsty.james5@wales.nhs.uk), Tel 01874 712419)
- Health Inspectorate Wales ([hiw@gov.wales](mailto:hiw@gov.wales), Tel 0300 062 8163)

Consideration should be given to the risks and benefits associated with sharing personal identifiable information with external authorities. Such sharing should only be undertaken in accordance with Powys CD LIN Information Sharing Code, and at the request of the CDAO. Where there is any doubt, guidance should be sought from the CDAO and PTHB Information Governance dept.

The records outlined in 5.3 should be routinely updated throughout the investigation, in sufficient detail to support a full review of the investigation at a later date should this be considered necessary.

## **5.5 Updating the CDAO**

The CDAO should be updated at appropriate intervals during the investigation, depending upon the nature of the concern, the risk assessment and the breadth of the investigation.

If at any stage the delegated person is of the view that the investigation is not progressing, or believes that the concern is more serious or widespread than that originally considered by the CDAO, they should raise this with the CDAO at the earliest opportunity.

### **5.6 Local / National Alerts**

Where considered necessary to reduce the risk of further harm or criminality, and at the explicit request of the CDAO, the delegated person may request NWSSP to issue an alert to one or more groups of NHS primary care contractors and NHS service providers in Powys or nationally. NWSSP link is Paula Bainbridge, [paula.bainbridge@wales.nhs.uk](mailto:paula.bainbridge@wales.nhs.uk).

Where considered appropriate, the alert should be distributed within the health board by the MM team, and to other relevant groups or persons e.g. Kaleidoscope Treatment Agency (link is Barry Eveleigh, [barry.eveleigh@kaleidoscopeproject.org.uk](mailto:barry.eveleigh@kaleidoscopeproject.org.uk) or Kath Davies [kath.davies@kaleidoscopeproject.org.uk](mailto:kath.davies@kaleidoscopeproject.org.uk), Tel 01686 610422)

Where there is any doubt about the need to disclose personal identifiable information, guidance should be sought from PTHB Information Governance dept.

A full record of all information disclosed in relation to controlled drugs concerns should be maintained.

A copy of any alert issued by NWSSP should be retained as part of the investigation process.

### **5.7 Completing the Investigation**

Upon completion of the investigation, the CDAO should be provided with a summary of the findings and a recommendation as to what further action, if any, is required.

Where agreed by the CDAO, the investigation may be completed and all records finalized.

Relevant details and learning points should be shared with the Controlled Drugs Local Intelligence network via the Health Board's quarterly Occurrence Report as appropriate.

## **6 Monitoring Compliance, Audit & Review**

All information and investigations associated with CD concerns or incidents will be routinely reviewed by the Chief Pharmacist.

This document will be reviewed every three years or earlier should audit results or changes to legislation / practice within PTHB indicate otherwise.
